1/4 (inside a block)	106,5 x 146,5 MM	–

Ready layouts are supplied by the Customer and can be designed with the following software:

Adobe InDesign (for Windows) INDD. Before sending the layout you should make a Package with types and images.

Color model – CMYK only.

Adobe PDF (for Windows). Used images should have resolution not less than 300 pixel/inch. Color model – CMYK only. In preparation of the PDF you should transform all image objects into curve lines. Do not use SPOT color, if it is not set by the order.

Adobe Illustrator (for Windows) EPS. All text objects should be transformed into curved lines (use the type menu command – create outlines). Images should have embedded type (embedded in a file). Color model – CMYK only. The Overprint feature in light objects should be set to off.

Adobe Photoshop (for Windows) TIF, EPS. PSD files are also admissible (text layers created by Type tool in Photoshop should be rasterized with the layer menu command – type/render layer). The file should have resolution not less than 300 pixel/inch. Color model – CMYK only. File names should contain only Latin letters

Requirements for objects contained in a layout:

Important elements (e.g. text, logo etc.) should be placed at a distance not less than 5-6 mm from a trim margin. Preparing a «Page on bleed» layout, take into consideration a joint type: glued or stapled. You should leave a space for important elements on the right or left somewhat bigger than minimal (approximately 12-15 mm). Text and vector objects colored in 100% black should have the «Overprint» attribute.

All layouts should be accompanied by a printed copy signed by the Customer at a scale of 1:1 made from a layout final file; the file name should be indicated on the layout.
